1 Purpose
nag_real_min_exponent (X02BKC) returns the minimum exponent argument $e_{\text{min}}$ of the model of floating-point arithmetic described in the x02 Chapter Introduction.

2 Specification
```
#include <nag.h>
#include <nagx02.h>
Integer nag_real_min_exponent
```

3 Description
nag_real_min_exponent (X02BKC) is a constant defined in the C Header file.
