NAG Library Function Document

nag_write_line (x04bac)

1 Purpose
nag_write_line (x04bac) writes a single line to an external file.

2 Specification
#include <nag.h>
#include <nagx04.h>
void nag_write_line (Nag_FileID fileid, const char *line)

3 Description
nag_write_line (x04bac) may be used to write to files opened with nag_open_file (x04acc).

4 References
None.

5 Arguments
1: fileid – Nag_FileID
   Input
   On entry: the identifier of the file to be written to. This must have been returned by a call of
   nag_open_file (x04acc).

2: line – const char *
   Input
   On entry: a character-string. This is written to the external file as a single record. Trailing blanks
   are not output, except that if line is entirely blank, a single blank character is output.

6 Error Indicators and Warnings
None.

7 Accuracy
Not applicable.

8 Parallelism and Performance
Not applicable.

9 Further Comments
None.

10 Example
See Section 10 in nag_open_file (x04acc).
