

NAG Library Routine Document

X02BHF

Note: before using this routine, please read the Users' Note for your implementation to check the interpretation of *bold italicised* terms and other implementation-dependent details.

1 Purpose

X02BHF returns the base parameter b of the model of floating-point arithmetic as described in the X02 Chapter Introduction.

2 Specification

```
FUNCTION X02BHF ( )  
INTEGER X02BHF
```

3 Description

None.

4 References

None.

5 Parameters

None.

6 Error Indicators and Warnings

None.

7 Accuracy

None.

8 Parallelism and Performance

Not applicable.

9 Further Comments

None.

10 Example

See Section 10 in X02AJF.
